

Tailored plastic profiles and gaskets for doors and sun protection

Advanced functionality and sustainability for your products

ADVANCED EXTRUSION TECHNOLOGY TO OPTIMIZE YOUR DOOR AND SUN PROTECTION SOLUTION

Primo designs and manufactures new innovative profiles for the window and door industry, including solutions for vertical and sliding industrial doors, profiles for awnings and textile screens, and gaskets for all types of opening solutions. We work closely with our customers to support their development projects, always striving to find the optimum solution. Our plastic profiles and gaskets are used to give the best functionality and sustainability to the final product.

SOLUTIONS FOR DOORS

Primo's customised side sealings improve wind tightness and heat loss combined with excellent sliding properties. Bottom and top profiles keep the weather out and help prevent injury and damage. Glazing beads improve insulation when installing glass panels. All kinds of special applications make customers' products more reliable, efficient and sustainable. By co-/tri-/quad extrusion and special finishing of the profiles, different features can be combined in a single product.

SOLUTIONS FOR SUN PROTECTION

Primo's custom-made sun protection profiles help to keep heat out. Advanced sliding properties and minimised thermal expansion support the functionality of textile screens, blinds, shutters, etc. Customers benefit from extended design and functional options and improved durability in special environments.

GASKETS

Primo gaskets come in a variety of shapes and sizes: 100% made-to-measure, as standard gaskets in various colours and volumes, and as mouldings and gaskets for the DIY market. They offer optimum performance in terms of thermal properties and energy efficiency, and are easy to install and clean, such as the new eco softline - a recyclable, innovative gasket. The range includes window ledge gaskets, overlap gaskets, skirtings, finishing profiles and much more.

PLASTICS FOR A SUSTAINABLE FUTURE

Sustainability is the core of Primo's operations and is integrated into all our processes. Our vision is a world without plastic pollution. We aim high and take action wherever we can. For example, we invest in machines to reuse used plastic so that it can be recycled into circular business models. We ensure that no microplastic particles leave our factories as part of Marine Litter Solutions.

Our commitments to sustainability:

By 2025
50% of our quotes will include specific options for CO₂ reductions by 2025

Optimise performance. Save resources.
PROFILES OF TOMORROW

Working with Primo, you will get a:

ONE STOP SHOP

Primo designs and manufactures tailored polymer profile solutions for the building industry. Our in-house tooling competence center guarantees optimal performance of the tools and the manufacturing process. We offer inline machining, finishing as well as packaging solutions to save resources in the assembly process.

GLOBAL BUSINESS PARTNER

Primo is a reliable business partner with decades of experience working together with leading windows and doors solution providers. Primo is a Danish family-owned company, consisting of production units in Europe and Asia ready to serve you. With our well-spread production capacity and raw material sourcing at group level we offer security in your supply chain.

MATERIAL & PROCESS SPECIALIST

Primo uses high-quality raw material and grades dedicated for the building applications including solutions for vertical and sliding doors, profiles for awnings and textile screens and gaskets for all kinds of opening solutions. Always fulfilling the industry's standards and special requirements. Our production lines and processes are optimised for highest output and quality.

DESIGN AND INNOVATION EXPERT

Through our material and extrusion technology know-how we support you in the development process. Our experts are at your full disposal - improving your projects and securing that the quality level is met and producibility of the products are optimised.

RESPONSIBLE SUPPLIER

We are committed to help customers reduce their Co2 emissions. We will do so by optimising our production process to use less material and resources and by investing in sustainable solutions. Together with customers and suppliers we will drive innovation in sustainable materials and designs and increase the uptake of recycled and renewable materials.
